

# Frozen in Time Ltd.

Manufacturers of Freeze Drying Machines  
and Vacuum Cold traps

## Lablyo Plus Freezedrier

### UK Manufactured

This unique freeze drier is suitable for many applications in numerous disciplines. The **Lablyo Plus** offers standard features not normally found in bench top freeze driers.

These include:

- Stainless steel drying chamber (30cm diameter x 37cm deep) with cooling and heating control (-40°C to +40°C)
- Stainless steel condenser chamber (20cm diameter x 22cm deep) with 4kg ice capacity
- 2kg ice collection per 24 hours
- -55°C condenser chamber temperature.
- Electric defrost on condenser chamber.
- 1.5hp non-CFC refrigeration system.
- Condenser chamber top flange can accommodate other accessories from our lablyo range.
- Microprocessor controlled touch screen display - temperatures and vacuum are displayed on a real time graph.
- Mobile temperature probes in drying chamber for product sampling.
- Clear acrylic lids for observing the process.

The separate condenser chamber and electric defrost capability ensures maximum output and minimum turnaround time. The separate product and condenser chambers eliminate the need to pre-freeze samples and their temperature can be controlled during freeze-drying.

Dimensions: 57cm x 92cm x 52cm (HxWxD)

The Lablyo Plus requires a vacuum pump and connection hose that is available separately.

### Part No's.

Lablyo Plus	FIT/LYO/53/1
Vacuum pump	FIT/LYO/59/0
Vacuum hose	FIT/LYO/37/0
<b>Also available compatible parts</b>	
Acrylic drying chamber	FIT/LYO/01/0
6 shelf rack	FIT/LYO/03/0
6 heated shelf rack	FIT/LYO/19/0
4 shelf vial closing device	FIT/LYO/22/0
8 port flask manifold	FIT/LYO/13/0
48 port ampoule manifold	FIT/LYO/25/0
Spin Freezer	FIT/LYO/28/0
